Riya Kapoor

NLP / Generative AI Engineer

riya.kapoor.sample@example.com | +91-90000-00000 | Pune, India | linkedin.com/in/riyakapoor-sample | github.com/riyakapoor-sample

SUMMARY

NLP-focused Data Science graduate with 1.5 years of applied experience building transformer-based text classification and retrieval-augmented generation (RAG) systems. Comfortable across the full ML lifecycle — data curation, model fine-tuning, evaluation, and deployment. Interested in production LLM applications and applied research roles.

EDUCATION

Btech AIML — Symbiosis Skills and Professional University, Pune
Graduated 2025 | CGPA: 8.7/10

TECHNICAL SKILLS

Languages: Python, SQL

NLP & GenAI: Hugging Face Transformers, spaCy, NLTK, LangChain, OpenAI API, prompt engineering, RAG, LoRA fine-tuning

ML / DL: PyTorch, TensorFlow, scikit-learn

Data & Tools: Pandas, NumPy, FAISS, Docker, Git, Power BI

Cloud: AWS (S3, EC2, SageMaker basics)

EXPERIENCE

NLP Intern — Lexicon AI Labs (sample) *Jan 2025 – Jun 2025*

- Fine-tuned a DistilBERT model for support-ticket classification across 12 categories, improving routing accuracy from 71% to 89%.
- Built a RAG-based internal documentation assistant using LangChain and FAISS, cutting average query resolution time by 35%.
- Ran systematic prompt evaluation for a customer-facing chatbot, reducing hallucination rate in test suite by 22%.

Data Science Intern — Northwind Analytics (sample) *Jun 2024 – Dec 2024*

- Built and maintained Power BI dashboards tracking pipeline and model performance metrics for a 5-person data team.
- Cleaned and labeled a 20k-row text dataset used for downstream sentiment classification.

PROJECTS

Domain-Specific Chatbot using RAG

- Built a retrieval-augmented chatbot over a 300-page product manual using LangChain + FAISS + OpenAI API; achieved 92% answer relevance on a 50-question eval set.

Sentiment Analysis on Product Reviews

- Fine-tuned BERT-base on 15k Amazon product reviews; achieved 0.91 F1-score, outperforming a TF-IDF + logistic regression baseline by 12 points.

CERTIFICATIONS

- DeepLearning.AI — Natural Language Processing Specialization (Coursera)
- DeepLearning.AI — Generative AI with Large Language Models (Coursera)

ADDITIONAL

- Kaggle: Top 15% in a text-classification competition (sample).
- Contributed documentation fixes to an open-source LangChain community project (sample).
