Arjun Mehta

Machine Learning Engineer — AI/ML

arjun.mehta.sample@example.com | +91-98000-11111 | Bengaluru, India | linkedin.com/in/arjunmehta-sample | github.com/arjunmehta-sample

SUMMARY

AI/ML Engineer with 2 years of experience designing, training, and deploying machine learning models in production. Strong foundation in classical ML and deep learning, with recent focus on model optimization and MLOps. Experienced in taking models from notebook prototypes to scalable, monitored APIs.

EDUCATION

B.Tech in Computer Science (AI/ML Specialization) — Sample Institute of Technology, Bengaluru
Graduated 2024 | CGPA: 9.5/10

TECHNICAL SKILLS

Languages: Python, C++, SQL

ML / DL: scikit-learn, TensorFlow, PyTorch, XGBoost, Keras

MLOps & Deployment: Docker, MLflow, FastAPI, AWS SageMaker, GitHub Actions

Data: Pandas, NumPy, Spark (basics), PostgreSQL

Core Concepts: Supervised/Unsupervised Learning, Model Evaluation, Feature Engineering, A/B Testing, Time-Series Forecasting

EXPERIENCE

Machine Learning Engineer — Meridian Analytics (sample) *Aug 2024 – Present*

- Built and deployed a churn-prediction model (XGBoost) serving 50k+ daily scoring requests via a FastAPI microservice, improving retention-campaign targeting precision by 18%.
- Set up an MLflow-based experiment tracking and model registry workflow adopted by a 4-person ML team.
- Automated model retraining and validation pipeline using GitHub Actions, cutting manual deployment effort by ~6 hours/week.

Machine Learning Intern — Northstar Robotics (sample) *Jan 2024 – Jul 2024*

- Trained a computer-vision defect-detection model (ResNet-based) achieving 94% precision on a manufacturing QA dataset.
- Built data augmentation and preprocessing pipeline that reduced model training time by 30%.

PROJECTS

Demand Forecasting Pipeline

- Built an end-to-end time-series forecasting pipeline (Prophet + XGBoost ensemble) for retail demand; reduced forecast error (MAPE) by 15% vs. baseline moving-average model.

Real-Time Fraud Detection Model

- Trained a gradient-boosted classifier on transaction data with heavy class imbalance (SMOTE + cost-sensitive learning); achieved 0.88 recall at 95% precision.

CERTIFICATIONS

- AWS Certified Machine Learning – Specialty
- DeepLearning.AI — Machine Learning Specialization (Coursera)
