Sanya Iyer

AI/ML Engineer — Computer Vision

sanya.iyer.sample@example.com | +91-97000-22222 | Hyderabad, India | linkedin.com/in/sanyaiyer-sample | github.com/sanyaiyer-sample

SUMMARY

AI/ML Engineer specializing in computer vision, with 2.5 years of experience building and deploying image classification, object detection, and segmentation models for real-world production use. Skilled at optimizing models for edge and low-latency inference alongside strong classical CV fundamentals.

EDUCATION

M.Sc. in Artificial Intelligence — Sample University of Technology, Hyderabad
Graduated 2023 | CGPA: 8/10

TECHNICAL SKILLS

Languages: Python, C++

Computer Vision: OpenCV, YOLOv8, Detectron2, Albumentations, Mediapipe

ML / DL: PyTorch, TensorFlow, ONNX, TensorRT

Deployment: Docker, NVIDIA Jetson, Flask/FastAPI, AWS S3/EC2

Data & Tools: Pandas, NumPy, Label Studio, Git, DVC

EXPERIENCE

Computer Vision Engineer — Veridian Vision Systems (sample) *Mar 2024 – Present*

- Built a real-time defect-detection pipeline (YOLOv8) for an assembly line, achieving 96% mAP and reducing manual QA inspection time by 40%.
- Optimized model inference using TensorRT on NVIDIA Jetson edge devices, cutting latency from 210ms to 48ms per frame.
- Deployed a video-based people-counting system across 30+ retail store cameras, monitored via a FastAPI + Docker service.

ML Intern — Orbitwave Labs (sample) *Aug 2023 – Feb 2024*

- Trained a semantic segmentation model (U-Net) for satellite imagery land-cover classification, achieving 0.87 IoU.
- Built a data labeling and augmentation pipeline using Label Studio and Albumentations for a 10k-image dataset.

PROJECTS

Real-Time Face Mask & PPE Compliance Detector

- Built and deployed a YOLOv8-based detector for PPE compliance monitoring on live CCTV feeds; achieved 93% precision at 25 FPS on edge hardware.

OCR Pipeline for Scanned Invoices

- Built an OCR + layout-parsing pipeline (Tesseract + custom post-processing) to extract structured fields from scanned invoices, reaching 95% field-level accuracy.

CERTIFICATIONS

- NVIDIA Deep Learning Institute — Fundamentals of Computer Vision
- DeepLearning.AI — Convolutional Neural Networks (Coursera)

ADDITIONAL

- Published a short technical blog post on model quantization for edge deployment (sample).
- Volunteer: taught an intro-to-CV workshop for undergraduate students (sample).
