efghij

PROFESSIONAL SUMMARY

Aspiring Data Analyst andData Scientist with hands-on experience in exploratory data analysis, dashboard development, and machine learning model building, translating complex data into actionable, data-driven insights. Proactive learner with a strong problem-solving mindset, seeking to work with data and analytics teams to create meaningful business impact.

EDUCATION

Government College of Chatrapati Sambhajinagar — MCA, 7.7 CGPA (May 2025)
Vivekanand Institute of Advanced Studies — BCS (Jun 2023)
Deogiri College — HSC (Jun 2020)

TECHNICAL SKILLS

Programming & Data Analysis: Python, NumPy, Pandas, EDA, Data Cleaning, Statistical Analysis

BI & Visualization: Power BI, Tableau, DAX, Power Query, Star-Schema Data Modeling, Dashboard Development

Machine Learning: Scikit-learn, TensorFlow, Keras, Model Training & Evaluation, Classification, Transfer Learning (CNN)

Databases & SQL: SQL, Joins, Aggregations, Subqueries, Data Querying

Core Competencies: Problem Solving, Critical Thinking, Analytical Thinking, Leadership, Team Collaboration, Adaptability

PROJECTS

CriminalID — AI Face Recognition System *(Python, TensorFlow, Keras, OpenCV, CNN, Streamlit)*

- Trained and evaluated a CNN-based machine learning model using MobileNetV2 transfer learning on a 14,000+ image augmented dataset, achieving ~92% validation accuracy.
- Performed data preprocessing and feature engineering, including a 12+ transform augmentation pipeline and OpenCV Haar cascade face detection, to prepare training data and improve model performance.

Multi-Hospital ER Performance & Optimization Dashboard *(Power BI, Excel, Power Query, DAX)*

- Designed and developed interactive Power BI dashboards using star-schema modeling, Power Query, and DAX to evaluate operational, clinical, and financial KPIs across a five-hospital network.
- Generated real-time and historical insights to assess capacity planning scenarios and identify bottlenecks, supporting decision-making and operational efficiency gains in the 15%–30% range.

CERTIFICATIONS

- Post-Graduate Program in Data Science and Analytics — Advanced ML Track, Imarticus Learning (May 2025 – Feb 2026)

SIMULATION PROGRAMS

- Accenture North America — Data Analytics and Visualization Job Simulation
- Deloitte — Data Analytics Job Simulation
